

Biopsy Wound Care

- You can take the bandaid off later today.
- No activity restrictions: exercise, bathing, etc. are all acceptable.
- You should apply plain Vaseline to the area twice a day.
- Please contact the office if you notice any signs of infection such as:
Bright green discharge, thick white pus, or redness streaking beyond the biopsy site.

We contact patients regarding their biopsies, whether benign or if it needs more treatment. We always leave a voicemail unless we are unable to do so for some reason. Please call us if you have not received your biopsy results and it has been 2 weeks since your appointment.

Manuka honey has natural antibacterial properties and may help support wound healing when used as directed. Manuka honey is available for purchase at our front desk. It may also be purchased through Amazon or other retailers.
